## My Footprint Activity

**Directions:** Go to the website [www.footprintnetwork.org](http://www.footprintnetwork.org) and calculate your ecological footprint. The questions will ask you household information. If you are unsure of an answer or how to respond, consider asking a peer or using data for an average American family. After you have completed the quiz, have fun exploring the website and answer the following:

1. How many Earths would be needed if everyone on the planet had your lifestyle?
2. Which of your consumption categories have the largest and smallest footprint?
3. Is your footprint bigger or smaller than the country average? Does this surprise you? Why or why not?
4. Which biome contributes the most to your footprint? Why do you think that is?
5. What are three ways that you can reduce your ecological footprint?
